

Sandwell/Hydro-Mécanique

CO-ENTREPRISE - JOINT VENTURE

À/TO 121260 Project Team	DE/FROM H. Pidcock	DATE 95.04.18
OBJ./OBJ. Domtar Specialty Fine Papers Secondary Effluent Treatment	PROJ. 121260	DOSS./FILE (Mem-086)

Mr. Stephen Larson, President of the Domtar Group met Mr. A. Pyatt, S. Venne, Louis Laperrière and T. O'Meara on March 29, 1995.

Mr. Larson showed a memo from the Domtar Cornwall project team with an evaluation of Sandwell/Hydro-Mécanique performance as engineers and contractors. The memo had "Good" and "Very Good" ratings in every category, which included:

- Engineering design
- Working relationships
- Individual performances of project, engineering and construction managers
- Construction quality

There were no "fair" or "bad" ratings.

The memo also stated that the project was completed under budget.

Mr. Larson also stated that it is the first time that a design build project has been rated so highly, and that this opens the door for further projects with Domtar.

All our project team members and all the other staff who supported us, including *NovaTec Consultants Inc.*, are congratulated on their individual efforts to make this project a success, and to help Sandwell and Hydro-Mécanique win a high rating from a Client company as important as Domtar.
